PROFESSIONAL SUMMARY

Senior Backend Engineer and Full Stack Developer with 3+ years of experience architecting scalable enterprise-grade applications using Node.js, NestJS, Python FastAPI, Angular, React.js, and Next.js.

Specialized in backend architecture, REST API engineering, Microservices development, authentication systems, RBAC implementation, scalable system design, enterprise workflow automation, and production-grade deployments.

Experienced in building secure enterprise medical systems, ERP platforms, barcode automation systems, AI chatbot integrations, LLM-powered workflows, OpenAI integrations, Docker-based deployments, AWS cloud infrastructure, and scalable backend systems for U.S.-based clients.

Strong expertise in SQL Server, MySQL, MongoDB, PostgreSQL, Redis, backend optimization, API performance tuning, CI/CD pipelines, Azure DevOps, and enterprise application delivery.

Hands-on experience with AI integrations, FastAPI AI services, intelligent enterprise APIs, AI-assisted workflows, scalable cloud deployments, automated testing, Agile methodologies, and high-performance backend systems.

TECHNICAL SKILLS

Backend Technologies - Node.js, Express.js, NestJS, Python, FastAPI, REST APIs, GraphQL, Microservices Architecture, JWT Authentication, RBAC, API Gateway, Socket.IO

Frontend Technologies - Angular, React.js, Next.js, JavaScript, TypeScript, Angular Material, Bootstrap, Tailwind CSS, Redux, RxJS

Databases - MySQL, MongoDB, SQL Server, PostgreSQL, SQLite, Redis, DynamoDB, MariaDB, Sequelize ORM, Prisma ORM

Cloud & DevOps - AWS, Docker, Docker Compose, Azure DevOps, GitHub Actions, CI/CD Pipelines, Git, GitHub, Linux Deployment, PM2, Nginx

AI & Automation - OpenAI API, AI Integration, LLM Integration, AI Chatbots, AI Agents, Prompt Engineering, AI Workflow Automation, FastAPI AI Services, RAG Systems

Testing & Documentation - Jest, Cypress, Swagger, Postman, API Documentation, Unit Testing

Architecture & Scalability - Scalable Backend Systems, Enterprise Applications, Secure APIs, Backend Architecture, Modular Architecture, Performance Optimization, Audit Logs, Multi-role Systems

PROFESSIONAL EXPERIENCE

Senior Software Developer – Sveltoz Solutions Pvt. Ltd., Pune - **March 2025 – Present**

- Architected and developed enterprise-grade medical and DNA analysis systems for U.S.-based clients with focus on scalability, security, and high performance.
- Engineered scalable backend architecture using Node.js, NestJS, and Microservices architecture.
- Developed secure REST APIs with JWT authentication, RBAC systems, audit logging, and enterprise workflow automation.
- Integrated Python FastAPI services with Node.js backend systems for AI-powered workflows and intelligent automation.
- Implemented AI chatbot integrations, OpenAI APIs, AI-assisted development workflows, and scalable backend optimization.
- Optimized MySQL and SQL Server queries, API performance, and backend operations for enterprise-scale systems.
- Managed Docker deployments, AWS infrastructure, Azure DevOps pipelines, GitHub workflows, and CI/CD release management.
- Implemented automated testing using Jest and Cypress to improve application reliability and production stability.
- Collaborated with Agile teams on architecture discussions, debugging, sprint planning, code reviews, and production deployments.

Key Projects

Enterprise Medical & DNA Analysis Platform

Technologies: Node.js, NestJS, Angular, SQL Server, Docker, AWS

- Developed forensic and postmortem laboratory automation systems used by U.S.-based medical laboratories.
- Integrated barcode tracking systems, JSReport templates, secure workflows, and audit trail logging.
- Built scalable backend APIs, enterprise workflow modules, and cloud deployment pipelines.
- Implemented secure RBAC systems and backend automation workflows for enterprise medical operations.

Enterprise AI Assistant & RAG System

Technologies: Node.js, NestJS, Python FastAPI, OpenAI API, MongoDB, PostgreSQL, Docker, AWS

- Developed AI-powered enterprise assistant system integrated with LLM workflows and intelligent document search functionality.
- Built scalable backend APIs using Node.js and NestJS with FastAPI AI services.
- Implemented AI chatbot workflows, enterprise automation systems, and intelligent AI integrations.

- Integrated OpenAI APIs, AI-based search systems, and backend automation workflows for enterprise productivity improvements.
- Optimized backend APIs, database performance, and cloud-based AI architecture for scalable enterprise usage.

Software Engineer – RA Infotech Solutions, Pune - **February 2023 – January 2025**

- Developed enterprise-grade full-stack applications using Angular, Node.js, React.js, PHP, and MySQL.
- Built and maintained scalable REST APIs integrated with MongoDB, SQL Server, MySQL, and enterprise backend systems.
- Engineered large-scale ERP Education Systems handling 29+ enterprise modules and multi-role workflows.
- Implemented Authentication and Authorization systems using JWT security, RBAC, and secure HTTPS communication.
- Developed reusable backend services, modular architecture, scalable frontend components, and responsive UI systems.
- Built Barcode Inventory and Asset Tracking systems with real-time reporting dashboards and backend integrations.
- Optimized backend APIs, database queries, and application performance for enterprise-level scalability.
- Managed Git workflows, deployment pipelines, CI/CD integration, debugging, testing automation, and production support.
- Collaborated with Agile teams on scalable architecture implementation and enterprise project delivery.

Key Projects

→ *ERP Education System – Vedanta*

Technologies: Angular, Node.js, React.js, MySQL

- Developed 29+ enterprise modules including HR, Payroll, Attendance, Examination, Reporting, Student Management, Library Management, and Administration.
- Built scalable backend APIs and responsive enterprise dashboard systems.
- Optimized enterprise reporting systems and database queries for high-volume usage.

→ *Barcode Inventory & Asset Tracking System*

Technologies: Node.js, React.js, next.js, MongoDB

- Developed enterprise barcode tracking platform with real-time inventory management workflows.
 - Implemented multi-role access systems, reporting dashboards, and scalable backend services.
-

Software Developer Intern – Swapra Technologies - October 2022 – February 2023

Worked on frontend and backend development using Angular, React.js, Python FastAPI, and SQLite database.

Developed responsive web applications and backend API integrations.

- Built Shirdi Sai Baba Pathasowtha Management System for user management and reporting workflows.
- Worked on CRUD operations, authentication systems, API integrations, debugging, and backend development.
- Assisted in deployment, testing, and maintenance activities.

➤ EDUCATION

Degree	Institute	Year	Score
MCA	Piren's Institute of Computer Technology, Loni	2020 – 2022	75%
BCA	Pune University	2018 – 2020	64%
Class XII	Maharashtra Board	2018	68%
Class X	Maharashtra Board	2015	72%

➤ CERTIFICATIONS

- *Team Leadership Award 2024* – RA Infotech Solutions
- JavaScript Certification – Swayam NPTEL
- PHP and MySQL – IIT Bombay Spoken Tutorial Project
- AI-Assisted Development & Enterprise Automation Workflows
- OpenAI API & AI Integration Workflows

➤ LANGUAGES

- Marathi – Expert
- Hindi – Expert
- English – Professional Working Proficiency
